### Description

Thyristor Device is a solid-state semiconductor device along with four layered alternating p-type and N materials. The thyristor with three-lead is designed for controlling large current with the help of its two leads by combining the current with that of a smaller current from its other lead which is known as the control lead. The two-lead thyristor are used in switching if the potential difference between its lead is large. The thyristor is also known as silicon-controlled rectifier. It is used to manage elements in phase angle triggered controllers, which is also known as phase fired controllers. It can also be used for low conduction losses of Bjt, this would help to fulfill demand in the current electric system.

Global Thyristors key players include Infineon, ON Semiconductor, Mitsubishi Electric, JieJie Microelectronics, etc. Global top four manufacturers hold a share over 35%.

Asia-Pacific is the largest market, with a share over 75%, followed by Europe, and North America, both have a share over 15 percent.

In terms of product, Unidirectional Thyristor is the largest segment, with a share over 45%. And in terms of application, the largest application is Civil Sector, followed by Industrial Sector, etc.

### Report Scope

This report quantifies the global Thyristors market in revenue (US\$ million) and, where applicable, sales volume (M Units), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/M Units) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Thyristors.

### Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
