Description

A time switch is a device that has a built-in mechanical or electronic timer that turns an electrical circuit on and off at certain times of the day. The electrical current typically is used to perform a task that otherwise would be done by a person. Time Switch work in a variety of areas, such as irrigation or other water pumps, indoor or outdoor lighting, ventilation systems and other devices that need to be turned on and off throughout the day. A time switch automatically performs these tasks so that a person doesn't have to remember to do so or have to physically flip a switch at certain times every day.

Global Time Switch key players include Intermatic Incorporated, leviton, Legrand, Honeywell, Hager, etc. Global top five manufacturers hold a share over 25%.

North America is the largest market, with a share over 30%, followed by Europe and China, both have a share over 40% percent. In terms of product, Digital Time Switch is the largest segment, with a share over 55%. And in terms of application, the largest application is Lightings, followed by Appliances and Industrial Devices.
