### Description

The electromagnetic spectrum of ultraviolet light can be subdivided in a number of ways. The draft ISO standard on determining solar irradiances (ISO-DIS-21348) describes the UVA (400~315nm), UVB (315~280nm), UVC (280~100nm). UVC LED is a kind of Ultra-violet LED (UV LED) with light emitted in the UVC spectrum.

SETi, Crystal IS and HexaTech captured the top three Production share in the UVC LED market, with about 62% market shares. North America is the largest consumption place, with a consumption market share nearly 61%. Following North America, Japan is the second largest consumption place with the consumption market share of 25%.

### Report Scope

This report quantifies the global UVC LED market in revenue (US\$ million) and, where applicable, sales volume (K Units), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K Units) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to UVC LED.

### Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
