### Description

This report studies the Sodium-Sulfur Battery (NaS) market, A sodium-sulfur battery is a type of molten-salt battery constructed from liquid sodium (Na) and sulfur (S). This type of battery has a high energy density, high efficiency of charge/discharge (89–92%) and long cycle life, and is fabricated from inexpensive materials. However, because of the operating temperatures of 300 to 350 °C and the highly corrosive nature of the sodium polysulfides, such cells are primarily suitable for large-scale non-mobile applications such as grid energy storage.

NGK, Sesse-Power, Wuhuhaili and Qintang New Energy are the main producers of sodium-sulfur batteries, NGK accounts for about 40 % of the market.

Japan is the largest production regions of Sodium-Sulfur Battery, with a production value market share nearly 80%. The second place is China with the market share about 10%.

### Report Scope

This report quantifies the global Sodium-Sulfur Battery market in revenue (US\$ million) and, where applicable, sales volume (MW), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/MW) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Sodium-Sulfur Battery.

### Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
