Description

A solar backsheet is the last layer at the bottom of the solar PV panel and is typically made of a polymer or a combination of polymers. One of the less visible but essential components of a solar panel to their long-term performance is backsheets. On the other hand, ethylene vinyl acetate also known as EVA provides encapsulation for solar cells.

Global Solar Back Sheet key players include Isovoltaic, Toppan, Coveme, Kremple, etc.

In terms of product, Composite Type is the largest segment, with a share over 75%.

Report Scope

This report quantifies the global Solar Back Sheet market in revenue (US\$ million) and, where applicable, sales volume (M Sq.m), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/M Sq.m) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Solar Back Sheet.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
