Description

This report studies the Protein Bars market. Protein bars are nutrition bars that contain a high proportion of protein to carbohydrates/fats. Protein bars are targeted to people who primarily want a convenient source of protein that doesn't require preparation (unless homemade). There are different kinds of food bars to fill different purposes. Energy bars provide the majority of their food energy (calories) in carbohydrate form. Meal replacement bars are intended to replace the variety of nutrients in a meal. Protein bars are usually lower in carbs than energy bars, lower in vitamins and dietary minerals than meal replacement bars, and significantly higher in protein than either. Protein bars are mainly used by athletes or exercise enthusiasts for muscle building.

Global Protein Bars key players include Quest Nutrition, VSI, Abbott Nutrition, Chicago Bar Company, General Mills, etc. Global top five manufacturers hold a share about 40%. USA is the largest market, with a share about 60%, followed by Europe, with a share about 20 percent. In terms of product, Medium Protein is the largest segment, with a share about 50%. And in terms of application, the largest application is Bodybuilders, followed by Pro/Amateur Athletes, etc.
