## Description

Industrial hose is a broad category of rubber hose intended for industrial use. Rubber hose is a reference to the outer cover of the hose and not the inner tube material. With pressures high or low, transfer rates slow or fast and with materials as simple as air and water or as complex as hazardous chemicals—every industrial hose application requires something a little different.

In Thailand, Industrial Hose key players include Sumitomo Riko, Semperit, Bridgestone, etc. Global top three manufacturers hold a share nearly 45%.

In terms of product, Textile Reinforced Products is the largest segment, with a share over 55%. And in terms of application, the largest application is Automotive, followed by Pharmaceutical and Food, Steelworks, Chemical Industry, etc.

## Report Scope

This report quantifies the global Industrial Hose market in revenue (US\$ million) and, where applicable, sales volume (K Meters), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K Meters) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Industrial Hose.

## Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
