Description

This report studies the Linear Guide Rail market, a Linear Guide (Linear rolling guide) allows a type of linear motion that utilizes rolling balls. By using circulating balls between the rail and the block, a Linear Guide can achieve high precision linear motion. Compared to a traditional slide, the coefficient of friction for a Linear Guide is only 1/50th. Because of the restraint effect between the rails and the blocks, Linear Guides can take up loads in both the up/down and the left/right directions. With these features, Linear Guides can greatly enhance moving accuracy; it is especially true when accompanied with precision ballscrews.

Global key players of Linear Guide Rail include THK, Hiwin, NSK, Bosch Rexroth, IKO and Schaeffler, etc. Top five players occupy for a share about 78%. Asia-Pacific is the largest market, with a share about 55%, followed by North America and Europe. In terms of product, Ball Linear Guide Rail is the largest segment, with a share over 62%. In terms of application, CNC Machine is the largest market, with a share over 45%.
