Description

An Injection molding machine, also known as an injection press, is a machine for manufacturing plastic products by the injection molding process. It consists of two main parts, an injection unit and a clamping unit. Machines are classified primarily by the type of driving systems: hydraulic, electric, or hybrid.

Instead of being driven by a hydraulic system, all-electric machines use digitally controlled, high speed and highly efficient servo motors to drive the whole process. Each axis is controlled by an independent motor for injection, extruder, clamping and ejection.

From the analysis of product segment, small and medium-sized models (clamping force ≤ 650 tons) occupy more than 90% of the market. Injection molding machines are mainly used in general plastics industry, automotive industry and home appliance industry.

Haitian International, ENGEL Holding GmbH, ARBURG GmbH, Sumitomo Heavy Industries, Milacron, Wittmann Battenfeld, Fanuc, Toshiba, Nissei Plastic, Husky, JSW Plastics Machinery, Toyo, Chenhsong, Yizumi, LK Technology, Cosmos Machinery, Tederic, UBE Machinery and Windsor are the key manufacturers of Plastic Injection Molding Machine.
