Description

Before recycling, most plastics are sorted according to their resin type. Most plastic reclaimers do not rely on the RIC now; they use various sorting systems to identify the resin, ranging from manual sorting and picking of plastic materials to automated mechanical processes that involve shredding, sieving, separation by density, air, liquid, or magnetic, and complex spectrophotometric distribution technologies e.g. UV/VIS, NIR, laser, etc.

Global Plastic Sorting Machine key players include Tomra, Pellenc ST, Bühler, Steinert, Satake, etc. Global top five manufacturers hold a share about 40%. Europe is the largest market, with a share about 42%, followed by Japan and China, both have a share about 45 percent. In terms of product, Chute-Type Sorting Machine is the largest segment, with a share over 50%. And in terms of application, the largest application is Plastic Flakes/Particles, followed by Pretreatment Plastics, etc.

Report Scope

This report quantifies the global Plastic Sorting Machine market in revenue (US\$ million) and, where applicable, sales volume (Units), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/Units) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Plastic Sorting Machine.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
