Description

A Portable Particle Counter is a sophisticated monitoring instrument that counts the amount of particulate contamination. It can be used to detect contaminants from the air, a surface or a liquid. Some examples of these particles can be anything from oil, metal shavings, dust, smoke, ash, mold, or other biological contaminants.

North America is the largest consumption area, with a consumption market share nearly 34%. Following North America, China is the second place consumption region with the consumption market share of close to 23%. Global Portable Particle Counter major manufacturers include Particle Measuring Systems, Rion, Lighthouse Worldwide Solutions, etc. The top three manufacturers account for about 40% of total share.

Portable Particle Counter is widely used in Medical & Pharmaceutical, Electronics, Foods and other industries. Medical & Pharmaceutical is its largest downstream market, which shares of about 40% of the total. According to the different type, Portable Particle Counter is divided into Airborne Portable Particle Counters and Liquid Portable Particle Counters.
