Description

Power take-off (PTO) is a device that transfers an engine’s mechanical power to another piece of equipment. A PTO allows the hosting energy source to transmit power to additional equipment that does not have its own engine or motor. For example, a PTO helps to run a jackhammer using a tractor engine. The power take-off is mainly used for dump trucks, fire trucks, cement mixer trucks, refrigerated trucks and other special vehicles that require additional power.

For the major players of Power Take Off (PTO), Interpump Group maintained its first place in the ranking. Interpump Group accounted for 38% the Global Power Take Off (PTO) revenue market share. Other players accounted for 12% and 7% including Parker and Hyva. In North America, total Power Take Off (PTO) accounted for 16%. In the Europe, accounted for 19%. The market in China accounted for 40%, in Japan 2%, in India 5%, in Southeast Asia 5% and in other region 13%. Among all regions, China is estimated to represent the highest share.
