### Description

Proton therapy is a type of radiation therapy. It USES a 200-ton device to shoot high-energy particles at the speed of about 2/3 of the speed of light to destroy tumor cells and rarely damage normal human tissues. The technique was first used in patients in the 1950s and perfected in the late 1970s.

Europe is the largest Proton Therapy Instrument market with about 57% market share. Japan is follower, accounting for about 22% market share.

The key players are BA, Varian, Hitachi, Mevion, Sumitomo, ProNova etc. Top 3 companies occupied about 71% market share.

### Report Scope

This report quantifies the global Proton Therapy Instrument market in revenue (US\$ million) and, where applicable, sales volume (Unit), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/Unit) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Proton Therapy Instrument.

### Key Companies & Market Share Insights
