Description

The slitter rewinder is a primary machine used in the conversion of Paper, Film, and Foil material. Designed to convert a wide roll of material into several thinner rolls, the slitter starts by unwinding a master or mill roll, continues by slitting the unwound material into various widths, and finally completes the process by rewinding the slit material onto cores of various widths.

The key players of Slitter Rewinders include Kampf, GOEBEL IMS, Nishimura, etc. The top three players of Slitter Rewinders account for approximately 38% of the total market. Asia-Pacific is the largest market of Lamination Adhesives for Slitter Rewinders accounting for about 55%, followed by Europe and North America. In terms of Type, Less Than 1000mm Wide is the largest segment, with a share about 48%. In terms of Application, the largest segment is Films, followed by Paper and Nonwoven Fabric.
