### Description

Small diesel engine (non-road) is one kind of diesel engines (also known as compression-ignition engine) with low power. A diesel engine is an internal combustion engine which uses the heat of compression to initiate ignition and burn the fuel that has been injected into the combustion chamber.

A small diesel engine (non-road) is the general term for a wide range of internal combustion engines used to power lawn mowers, generators, concrete mixers and many other machines that require independent power sources and are not used on the road.

Global Small Diesel Engine (Non-Road) key players include Yanmar, Kubota, Kohler, Isuzu, John Deere, etc. Global top five players hold a share about 45%.

Europe is the largest market, with a share about 40%, followed by North America and Japan, having a total share about 40 percent.

In terms of product, Water-cooled engine is the largest segment, with a share about 80%. And in terms of application, the largest application is Agriculture, followed by Lawan And Garden, Construction, Generator.
