Description

Steamed buns machine is a machine used to fold steamed buns. The automatic filling function ensures the velocity and consistency. With the machine, we can feed the savory meat, vegetarian fillings or any other types of fillings directly into the dough, or feed the fillings into a sheet made of dough and then the filled dough is carefully rolled up into a tube, finally it's segmented into individual bun with delicate floral print on top. It can be widely used in restaurant, hotel, catering, dining room, bakery, frozen food factory, snacks factory etc. The major players in global Steamed Buns Machine market include Xuzhong Food Machinery, Beijing Jingmei, Hebei Dahongxing, etc. The top 3 players occupy about 20% shares of the global market. China is the main market, and occupies about 85% of the global market. Steamed Buns Machine without the Rolling Part is the main type, with a share about 90%. Restaurant is the main application, which holds a share about 60%.
