### Description

Sterilization Container for medical use is a rigid reusable sterile container system used for the packaging, transportation, and storage of medical instruments prior to during, and after sterilization. As an alternative to the wrap and pouch materials commonly used to package cassettes and instruments, Sterilization Containers provide significant economic and environmental benefits along with enhanced safety.

Generally, the container system consists of lids, a body and a bottom, with assorted accessories such as baskets, filters, clamps, organization tools, containment devices, and tamper evident locks.

The leading players are Aesculap, Wagner, Medline, CareFusion and KLS Martin, accounting for 87 percent revenue market share. The Major sales regions of Sterilization Containers are Americas, Europe and Asia-Pacific. Europe is the largest sales region with a market share of 52%. Americas and Asia-Pacific ranked the second and third place with market share of 27% and 16% respectively.
