Description

Strapping machines are various types of equipment that perform the action of bundling together products or parts by way of a strap or several straps that fasten an item to a material handling product, usually a pallet. Strapping is performed for many applications, including the reinforcement of packaging, which is the primary method of fastening products to a pallet. Strapping is also used as a method of combining many small products into one large bundle for easier material handling purposes.

Global Strapping Machines main players are Signode, Samuel Strapping, Baosteel, Anshan Falan, etc. Global top four manufacturers hold a share about 35%. China is the largest market, with a share about 45%.

Report Scope

This report quantifies the global Strapping Machines market in revenue (US\$ million) and, where applicable, sales volume (K Units), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K Units) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Strapping Machines.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
