Description

A supercharger (also known as a blower) is an air compressor used to force air into the combustion chambers of an internal combustion engine at pressures higher than would otherwise be the case. A supercharger is a unit that bolts to your engine and connects with a belt between your crankshaft and the supercharger unit. In United States, Supercharger key players include EATON, Vortech, etc. Global top two manufacturers hold a share over 85%.

In terms of product, Roots Supercharger is the largest segment, with a share nearly 85%. And in terms of application, the largest application is Passenger Vehicle, followed by Commercial Vehicle.

Report Scope

This report quantifies the global Supercharger market in revenue (US\$ million) and, where applicable, sales volume (K Units), using 2025 as the base year and providing annual historical and forecast data for 2021–2032. It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K Units) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Supercharger.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
