### Description

Tubular solenoids are on/of-type linear solenoids and provide fairly flat force stroke characteristics due to their tubular shape and their plunger geometry; they are well suited for applications asking for long strokes but not highest forces.

Global Tubular Solenoids key players include Johnson Electric, TDS, Magnet Schultz Ltd, Shindengen, Delta, etc. Global top five manufacturers hold a share about 23%. Asia-Pacific is the largest market, with a share about 57%, followed by North America and Europe, both have a share over 35 percent. In terms of product, Max Stroke Less than 15mm is the largest segment, with a share over 74%. And in terms of application, the largest application is Home Appliance, followed by Industrial Automation Machine, etc.

### Report Scope

This report quantifies the global Tubular Solenoids market in revenue (US\$ million) and, where applicable, sales volume (K Units), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/K Units) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Tubular Solenoids.

### Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
