Description

Twin screw extruder is the classic machine used for the plastic extrusion process when two or more ingredients are mixed or compounded. The process is best suited when extruding reactive polymeric materials. It has higher economic opportunities and business potential than single screw extruders, owing to higher process flexibility and productivity, to produce wider range of end products, to convert materials and handle product quality more consistently, to compensate the effect of screw wear through screw speed adjustment. For the Twin-screw Extruders industry, the market is concentrated. Coperion, Milacron and JSW are the leader companies globally. On the basis of product type, Co-Rotating type segment is projected to account for the largest consumption value market share during the forecast period; this segment was estimated to account for 57% share in 2019 in terms of consumption value.

Report Scope

This report quantifies the global Twin-screw Extruders market in revenue (US\$ million) and, where applicable, sales volume (Units), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/Units) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Twin-screw Extruders.

Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
