### Description

Twist Drill (also commonly referred to as twist bit) is a rotating cutting tool, used for cutting holes in rigid materials, that consists of an essentially conical point, relieved and fluted to form cutting lips, and spiral flutes which direct the chips away from the lips and toward ejection from the hole. Twist drills are the most common and easiest way to put a hole in steel, wood or other non-ferrous materials.

Global Twist Drill key players include TDC Cutting Tool, Feida, Tiangong International, Harbin No.1 Tool, Harbin Measuring & Cutting Tool, etc. Global top five manufacturers hold a share over 15%.

China is the largest market, with a share over 65%, followed by USA and Europe, both have a share over 15%. In terms of product, Straight Shank Twist Drill is the largest segment, with a share over 50%. And in terms of application, the largest application is Metal, followed by Concrete, Wood, etc.

### Report Scope
