Description

The principle of Ultrasonic Welding Machine is to transfer high-frequency vibration wave to the surfaces of two objects to be welded. Under pressure, the surfaces of two objects rub against each other to form the fusion between molecular layers.

The main manufacturers of Ultrasonic Welding Machines in the market include Branson (Emerson), Herrmann and Schunk. The top ten enterprises in the world account for nearly 54% of the market,

The main consumer countries of ultrasonic welding machines are the United States, China, Germany, Japan and other countries and regions with industrial development system. These regions account for more than most of the global market.

Report Scope

This report quantifies the global Ultrasonic Welding Machine market in revenue (US\$ million) and, where applicable, sales volume (Units), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of types and applications, harmonizes vendor attribution, and presents comparable time series by company, type, application, and region/country, including indicative price bands (US\$/Units) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for manufacturers, new entrants, channel partners, and investors; the report also reviews technology shifts and notable product introductions relevant to Ultrasonic Welding Machine.

Key Companies & Market Share Insights
