Description

A vaccine refrigerator is a refrigeration unit designed specifically for storing vaccines and other temperature-sensitive medical supplies, most of which need to be held at temperatures lower than that of a conventional fridge. The unit provides extremely stable low temperatures to prevent degradation of vaccines and other products, along with options like alarms and backup power to provide complete protection. In the report we mainly calculated the refrigerator range from 2° to 8°.

Market competition is intense. Panasonic, Dometic, Haier, Kirsch Medical, Helmer, SO-LOW, Follett, Standex, etc. are the leaders of the industry. The top 5 are Panasonic, Dometic, Haier, Kirsch Medical and Helmer, with about 38% market shares.

North America is the largest consumption place, with a consumption market share nearly 41%. Following North America, Europe is the second largest consumption place with the consumption market share of 27%.
