Description

A vertical lift module (VLM) is an enclosed system that consists of two columns of trays with an inserter/extractor in the center. The VLM inserter/extractor automatically locates stored trays and retrieves trays from both the front and back of the unit with a push of a button and delivers them to the operator at an ergonomically positioned pick window.

Global Vertical Lift Module (VLM) key players include Kardex Remstar, Modula, Hanel, etc. Global top three manufacturers hold a share about 50%.

Europe is the largest market, with a share about 35%, followed by North America and Asia-Pacific, both have a share about 55 percent.

In terms of product, Single Level Delivery is the largest segment, with a share about 60%. And in terms of application, the largest application is Industrial Manufacturing, followed by Automotive.
