Description

This report studies the Vertical Multistage Centrifugal Pump market, Vertical centrifugal pumps are also referred to as cantilever pumps. They utilize a unique shaft and bearing support configuration that allows the volute to hang in the pump while the bearings are outside the pump. This style of pump uses no stuffing box to seal the shaft but instead utilizes a "throttle bushing". A common application for this style of pump is in a parts washer. A centrifugal pump containing two or more impellers is called a multistage centrifugal pump. The impellers may be mounted on the same shaft or on different shafts.

Globally, the vertical multistage centrifugal pump industry market is low concentrated as the manufacturing technology of vertical multistage centrifugal pump is relatively matures than some high-tech equipment. And some enterprises, like Grundfos, Ebara, KSB, WILO and Xylem, etc. are well-known for the wonderful performance of their vertical multistage centrifugal pump and related services, with about 54% market shares. Europe, North America and China are the major consumption regions and their market share is 24%, 21% and 27%.
