### Description

Workholding product provide fundamental functions, locating and clamping.

Workholding is the generic term for any device used to firmly hold your workpiece while machining it.

Although machine shops tend to focus more on other components of the machining process, such as the machine itself or the cutting tools, the importance of proper workholding should not be underestimated. If put in place properly, workholding devices will allow the machine to work at its full potential, allowing people to produce quality parts efficiently. On the contrary, if underestimated it can lead to failure.

North America key players of Workholding Product include Hardinge, Inc., 5th Axis, Röhme, Jergens, Inc, ENERPAC and Dover, etc. Top three players occupy for a share about 18%. In terms of product, Chucks is the largest segment, with a share over 56%. In terms of Industry, Automotive is the largest market, with a share over 35%.
