Description

Dermal fillers help to diminish facial lines and restore volume and fullness in the face. Botulinum toxin (BTX) is a neurotoxic protein produced by the bacterium clostridium botulinum and related species. It prevents the release of the neurotransmitter acetylcholine from axon endings at the neuromuscular junction and thus causes flaccid paralysis. Infection with the bacterium causes the disease botulism.

Market competition is intense. Allergan, Galderma, LG Life Science, Ipsen, Merz, etc. are the leaders of the industry. Allergan hold the largest market share of 58.7% in 2019.
