Description

A plethysmograph is an instrument for measuring changes in volume within an organ or whole body (usually resulting from fluctuations in the amount of blood or air it contains).

It is most commonly used to gauge the volume of a specific organ or limb, but can also measure the body as a whole. Generally, a body or organ will change volume due to a variation in the amount of blood or air in contains.

The major global manufacturers of plysmography are BD (CareFusion), Ganshorn, Cosmed, MEC, Geratherm, Hokanson and MGC Diagnostics. BD (CareFusion) and Ganshorn are the top two, with a combined 59% market share.

Report Scope

This report quantifies the global Plethysmograph market in terms of revenue (US\$ million) and, where applicable, sales volume (Units), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of Types and Applications, harmonizes vendor attribution, and presents comparable time series by company, Type, Application, and region/country, including indicative price bands (US\$/Units) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for brand owners, manufacturers, retailers, channel partners, and investors; data are structured with consistent units and fields to facilitate integration into internal FP&A and BI systems.

Key Companies & Market Share Insights
