### Description

Point-of-care Diagnostics (POC) is defined as medical testing at or near the site of patient care. The driving notion behind POCT is to bring the test conveniently and immediately to the patient. This increases the likelihood that the patient, physician, and care team will receive the results quicker, which allows for immediate clinical management decisions to be made.

In United States, POC Diagnostics key players include Alere, Roche, Abbott Laboratories, Johnson & Johnson, etc. Global top four manufacturers hold a share over 50%.

In terms of product, Blood Glucose Testing is the largest segment, with a share over 45%. And in terms of application, the largest application is Clinics, followed by Hospitals, Laboratory, etc.

### Report Scope

This report quantifies the global POC Diagnostics market in terms of revenue (US\$ million) and, where applicable, sales volume (K Units), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of Types and Applications, harmonizes vendor attribution, and presents comparable time series by company, Type, Application, and region/country, including indicative price bands (US\$/K Units) and concentration ratios (CR5/CR10).

The outputs are intended to support strategy development, budgeting, and performance benchmarking for brand owners, manufacturers, retailers, channel partners, and investors; data are structured with consistent units and fields to facilitate integration into internal FP&A and BI systems.

### Key Companies & Market Share Insights

This section profiles leading manufacturers, combining 2021–2025 results with a 2026–2032 outlook. It reports revenue, market share, price bands, product and application mix, regional and channel mix, and key developments (M&A, capacity additions, certifications). It also provides global revenue, average price, and—where applicable—sales volume by manufacturer, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
