Description

Placenta is the vascular organ in most mammals that connects the fetus to the uterus of the mother. It mediates the metabolic exchanges of the developing individual through an intimate association of embryonic tissues and of specific uterine tissues, which serve the functions of respiration, nutrition, and excretion. Placentas are also used as a source of extracts for ingredients in various consumer products.

The classification of Placenta includes Ovine, Porcine, Equine and Others. Ovine accounted for a share of 44% in the global Placenta market.

Japan is the largest consumption place, with a consumption market share nearly 36%. Following Japan, Europe is the second largest consumption place with the consumption market share of 15%.

Market competition is intense. Japan Bio Products, Charites Japan, Japan Natural Laboratories, Bovogen Biologicals, Thimba Li, Agri-Lab Co-Products, etc. The top five vendors held 51% of the market, in terms of Placenta revenue.

Report Scope

This report quantifies the global Placenta market in terms of revenue (US\$ million) and, where applicable, sales volume (MT), using 2025 as the base year and providing annual historical and forecast data for 2021–2032.
