Description

Targeted RNA-sequencing (RNA-Seq) is a highly accurate method for selecting and sequencing specific transcripts of interest and offers both quantitative and qualitative information. Targeted RNA-Seq can be achieved via either enrichment or amplicon-based approaches, both of which enable gene expression analysis in a focused set of genes of interest, with enrichment assays also providing the ability to detect both known and novel gene fusion partners in many sample types.

In the report, we only collect information about the companies who can provide targeted RNA sequencing service.

Market competition is not intense. Thermo Fisher, Illumina, Roche Holdings, BGI, Eurofins, etc. are the leaders of the industry, with about 52% market shares.

North America is the largest consumption place, with a consumption market share nearly 32%. Following North America, Europe is the second largest consumption place with the consumption market share of 28%.

Report Scope

This report quantifies the global Targeted RNA Sequencing market in terms of revenue (US\$ million) and, where applicable, service volume (k units), using 2024 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of service Types and end-use Applications, harmonizes provider attribution, and delivers comparable time series by company, Type, Application, and region or country, including indicative price bands (US\$/k units) and concentration ratios (CR5/CR10). Outputs are intended to support service design, budgeting, capacity planning, and benchmarking for providers, platforms, channel partners, and investors; the report also reviews technology shifts and notable service innovations relevant to Targeted RNA Sequencing.

Key Companies & Market Share Insights

This section profiles leading service providers with 2021–2025 results and a 2026–2032 outlook—covering revenue, market share, price bands, service portfolio and client mix, regional and channel mix, and key developments (M&A, network expansion, certifications). It also provides global revenue, average price, and—where applicable—volume metrics by provider, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
