Description

Digital banking is a move to online banking, where banking services are provided over the Internet.Over the years, the market for digital channel platforms has evolved from online and mobile specific banking solutions to digital banking platforms that are not related to channels.Advanced and mature digital banking platforms are highly flexible and can integrate many different banking services through a good interactive user interface (UI) or customer experience.This factor is the main reason why global companies have such a strong pull on digital banking.In addition, Banks are now under enormous pressure to improve operational efficiency and reduce bank costs while providing advanced next-generation digital banking services.Digital banking platform vendors are now developing smart and smart banking platforms to meet the needs of Banks and customers.This includes the need for channel integration support and dynamic customer experience to make core banking easier to implement, as well as the devices customers want to use or are interested in and affordable.The digital banking industry is relatively fragmented, with many small and new companies.Large global companies are mainly located in the us and Europe.American and European companies have a long history and an unshakable position in this field.The main markets for digital banking are in developed countries.North America has the largest market for digital banking platforms in terms of revenue generation.The regional market was driven by the early adoption of digital technology in banking.The asia-pacific market is expected to grow at a good pace during the forecast period.Strong growth in IT infrastructure and significant investment in digital banking by public and private companies are expected to support growth in the regional market.North America had a 37 percent market share in 2018, followed by Europe with 38 percent.The asia-pacific consumer market is growing even faster, however, with a market share of only 20 percent in 2018.In the rest of Asia Pacific, the Australian market is developing relatively well.In 2018, pc-based digital banking accounted for about 67% of the market share, and most of the products of the market belong to pc-based digital banking. In 2018, the market share of mobile digital banking was 33%. It is expected that the number of mobile digital banking will increase significantly in the next few years.Small and medium-sized enterprises (smes) are still the main application group in the market, accounting for about 59% of the market share in 2018. The development rate of smes is faster than that of large enterprises. By 2025, the market share of smes will expand to 60%.The development of digital Banks in China is relatively backward compared with that in Europe and the United States. Many large enterprises are still in the financing stage, and the market is expected to develop rapidly in the next few years.

The leading market for digital banking is the United States, with about 50% of the market, followed by Europe, with about 30%.

Major enterprises include SAP, Misys, Q2, Kony, Infosys, etc., with the top three accounting for about 45%.

Report Scope

This report quantifies the global Digital Banking market in terms of revenue (US\$ million) and, where applicable, service volume (), using 2024 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of service Types and end-use Applications, harmonizes provider attribution, and delivers comparable time series by company, Type, Application, and region or country, including indicative price bands (US\$/) and concentration ratios (CR5/CR10). Outputs are intended to support service design, budgeting, capacity planning, and benchmarking for providers, platforms, channel partners, and investors; the report also reviews technology shifts and notable service innovations relevant to Digital Banking.

Key Companies & Market Share Insights

This section profiles leading service providers with 2021–2025 results and a 2026–2032 outlook—covering revenue, market share, price bands, service portfolio and client mix, regional and channel mix, and key developments (M&A, network expansion, certifications). It also provides global revenue, average price, and—where applicable—volume metrics by provider, and calculates CR5/CR10 and rank changes to support comparative benchmarking.

3. This report will help stakeholders to understand competitors better and gain more insights to strengthen their position in their businesses. The competitive landscape section includes the market share and rank (in volume and value), competitor ecosystem, new product development, expansion, and acquisition.
4. This report stays updated with novel technology integration, features, and the latest developments in the market
5. This report helps stakeholders to gain insights into which regions to target globally
6. This report helps stakeholders to gain insights into the end-user perception concerning the adoption of Digital Banking.
7. This report helps stakeholders to identify some of the key players in the market and understand their valuable contribution.

Chapter Outline

Chapter 1:

Research objectives, research methods, data sources, data cross-validation;

Chapter 2:

Introduces the report scope of the report, executive summary of different market segments (product type, application, etc), including the market size of each market segment, future development potential, and so on. It offers a high-level view of the current state of the market and its likely evolution in the short to mid-term, and long term.

Chapter 3:

Provides the analysis of various market segments product types, covering the market size and development potential of each market segment, to help readers find the blue ocean market in different market segments.

Chapter 4:

Provides the analysis of various market segments application, covering the market size and development potential of each market segment, to help readers find the blue ocean market in different downstream markets.

Chapter 5:

Introduces executive summary of global market size, regional market size, this section also introduces the market dynamics, latest developments of the market, the driving factors and restrictive factors of the market, the challenges and risks faced by companies in the industry, and the analysis of relevant policies in the industry.

Chapter 6:

Detailed analysis of Digital Banking companies' competitive landscape, revenue market share, latest development plan, merger, and acquisition information, etc.
