### Description

Weight management refers to a new weight solution that professional doctors or dietitians give personalized plans of comprehensive nutrition, exercise, lifestyle and other elements according to the physical characteristics of customers, and carry out real-time monitoring and recording of food, water and exercise amount on the day.

Globally, the weight management market was concentrated as North America, Europe, China etc, and occupied 70% of market share.

### Report Scope

This report quantifies the global Weight Management market in terms of revenue (US\$ million) and, where applicable, service volume (K Units), using 2024 as the base year and providing annual historical and forecast data for 2021–2032.

It standardizes definitions of service Types and end-use Applications, harmonizes provider attribution, and delivers comparable time series by company, Type, Application, and region or country, including indicative price bands (US\$/K Units) and concentration ratios (CR5/CR10). Outputs are intended to support service design, budgeting, capacity planning, and benchmarking for providers, platforms, channel partners, and investors; the report also reviews technology shifts and notable service innovations relevant to Weight Management.

### Key Companies & Market Share Insights

This section profiles leading service providers with 2021–2025 results and a 2026–2032 outlook—covering revenue, market share, price bands, service portfolio and client mix, regional and channel mix, and key developments (M&A, network expansion, certifications). It also provides global revenue, average price, and—where applicable—volume metrics by provider, and calculates CR5/CR10 and rank changes to support comparative benchmarking.
